

WILDLAND FIRE RESCUE HELICOPTER

AIR CENTER
HELICOPTERS

AIR CENTER HELICOPTERS with AIR RESCUE CONCEPTS announce the availability of a Type 1 Wildland Fire Rescue Helicopter, which fills the emergent need to recover injured wildland firefighters without delay

Prior incidents demonstrated a need for rapid treatment and transport capability

Previously agencies performing these rescues, were hampered by response obstacles and often delivered basic level EMS providers to a critical scene

AS332 Super Puma

- Advanced Life Support (ALS) crewmembers
- Standard category aircraft
- Rescue hoist equipped
- Part 133 Class D human external load approved
- Part 135 Operator
- True OEI capability at higher altitudes
- Night Vision Goggle (NVG) equipped
- 600-gallon aerial suppression capability
